Property Description

The villa Corazon de la Selva is as majestic as the jungle where it is set. On approach, this new, luxury home is beautifully framed by the wooded environment – distinct and aptly placed. Perched on a ridge overlooking the Pacific, Corazon de la Selva commands soul-restoring ocean views. Its floor-to-ceiling windows invite the wilderness in and charge the interiors with natural energy while beckoning refreshing breezes throughout. Designed in the NeoTropical modern style by architect Eric Bogantes of ALIANZ, it uses concrete and glass in perfect proportion. The rooms are expansive yet never overwhelm, instead they embrace, comfort and inspire. The grandest space is the primary living area with a cathedral ceiling of almost three stories encased in floor-to-ceiling windows conjuring the sensation of being seated within the canopy. This room is steps down from the main floor and leads out to a deck bordered by a Balinese-tiled wraparound pool effectively blurring the boundaries between inside and out.
